Book time with me!

EXPERIENCE

Fitech 2022 - 2023

DevOps, AWS, Terraform, Kubernetes, MEND, CICD, Bamboo, Microservices, ElasticSearch, ArgoCD

At Fitech, we're Kanban masters with the heart of a panda - bamboo strong, but cuddly as microservices. Our automated systems scale like bamboo, and we work in harmony like a well-tuned Kanban board.

Magently 2022

Php, SQL, Magento, Vue.js, Bootstrap, Gerrit, Redmine

Magently - where I learned that PHP is not my passion, but I still built awesome Magento 2 modules with Vue 3, SQL, and Bootstrap. I used Git with Gerrit to store code and Redmine to track progress. Looking for exciting new opportunities outside the world of PHP.

Ideo 2021

Php, SQL, Laravel, CMS, Bootstrap, Git, Plugin Development

I crafted bespoke plugins for the Editio CMS with PHP and Laravel, but now I'm looking for a more sophisticated language to unleash my full potential.

OPEN SOURCE CONTRIBUTIONS

n8n-nodes-wordnik 2023

N8n, Wordnik, TypeScript, Docker, Npm

Wordsmiths, rejoice! n8n-nodes-wordnik adds the power of the Wordnik API to n8n, the workflow automation platform. Now you can search, define, and dissect words without even opening a dictionary (or your mouth).

SIDE PROJECTS

Friendly adventure 2023, still WIP

Bash, Bare repo, CLI, DevOps, Backup automation

Say bon voyage to boring backups and ahoy to automated adventure with Friendly Adventure! The bash script that keeps your dot files safe and sound on GitHub, no parrots or peg legs required.

Silver eureka 2022, still WIP

Ansible, Bash, Logger, GitOps

The bash script that makes your computer a lean, mean, Ansible-running machine. Say goodbye to manual setup and hello to automation, Eureka-style!

Verbose Broccoli 2022

Ansible, Github actions, Hetzner, Cloudflare

Because setting up servers shouldn't feel like eating your veggies. Automate Hetzner setup with Cloudflare DNS, Docker, n8n, and NGINX Proxy Manager using GitHub Actions.

EDUCATION

Master of Problem-Solving 2019 - 2023

State Higher School of Technology and Economics in Jaroslaw.

My diploma says I'm a computer scientist, but my family still calls me when their printer won't work.

SKILS

Infrastructure

GitHub action
Automate all the things

CloudFlare pages
Speedy websites for the win

CloudFlare workers
Serverless but not clueless

Docker compose
Containerize all the things

Ansible
Provision like a boss

Terraform
Infrastructure as code ninja

AWS
The cloud is my playground

MEND
Open source security is my jam

Miscellaneous

Linux
Penguin power

Bash
Type less, do more

Git
Push it real good

Regex
Find and replace on steroids

Googling
Because I don't know everything (yet)

Shortcut freak
Productivity ninja at your service

Languages

Polish
Native and can talk the hind legs off a donkey

English
B2 language certified boss-level writer
